GO Markets began in Australia in 2006 as an online provider of CFD trading services. Over the last 15 years, we have been dedicated to evolving our technology, services and education, in order to provide our clients with the best possible trading experience. Through this dedication, we've established ourselves as a leading and trusted global broker. We offer hundreds of tradable CFD instruments including Forex, Shares, Indices and Commodities. Formed in 2006, GO Markets is widely recognized as Australia's first MT4 broker. We have since added MT5, mobile trading and a web-based version to our trading platform suite. GO Markets offers spread-based and commission-based accounts. We aim to be the first choice for CFD trading, for every level of trader. We constantly look to take clients' trading experience beyond expectations – through committed customer service, transparent pricing, low-latency execution and platform stability.
